Tom Kibble is an inspirational theoretical physicist who has made profound contributions to our understanding of the physical world. To celebrate his 80th birthday a one-day symposium was held on March 13, 2013 at the Blackett Laboratory, Imperial College, London. This important volume is a compilation of papers based on the presentations that were given at the symposium. The symposium profiled various aspects of Tom's long scientific career. The tenor of the meeting was set in the first talk given by Neil Turok, director of the Perimeter Institute for Theoretical Physics, who described Tom as “our guru and example”. He gave a modern overview of cosmological theories, including a discussion of Tom's pioneering work on how topological defects might have formed in the early universe during symmetry-breaking phase transitions. Wojciech Zurek of Los Alamos National Laboratory continued with this theme, surveying analogous processes within the context of condensed matter systems and explaining the Kibble – Zurek scaling phenomenon. The day's events were concluded by Jim Virdee of Imperial College, who summarized the epic and successful quest of finding the Higgs boson at the Large Hadron Collider at CERN. At the end of the talk, there was a standing ovation for Tom that lasted several minutes. In the evening, Steven Weinberg gave a keynote presentation to a capacity audience of 700 people. He talked eruditely on symmetry breaking and its role in elementary particle physics. At the banquet dinner, Frank Close of Oxford University concluded the banquet speeches by summarizing the significance of Tom's contributions to the creation of the Standard Model. Contents: Tom Kibble and the Early Universe as the Ultimate High Energy Experiment (Neil Turok) Universality of Phase Transition Dynamics: Topological Defects from Symmetry Breaking (Adolfo del Campo and Wojciech H Zurek) The Quest for the Higgs Boson at the LHC (Tejinder S Virdee) Tom Kibble: Breaking Ground and Breaking Symmetries (Steven Weinberg) Tom Kibble at 80: After Dinner Speech (Frank Close) Publication List — Tom W B Kibble Readership: Graduate students and researchers in particle physics, cosmology, high energy physics and astrophysics. Keywords: Tom Kibble; Higgs Boson; LHC; Symmetry-Breaking; Elementary Particle Physics; Cosmology; High Energy Physics Reviews: “The overall structure of the volume is well-conceived as to capture and convey to a wide variety of audiences the fundamental long-range contributions given by Kibble. This book represents a precious cross-disciplinary reference for both specialists in different fields as well as for graduate students willing to get acquainted with the challenging ideas of contemporary theoretical physics.” *Il Nuovo Saggiatore*

Symphony conductor Don Fernando longs to hear the sounds of the shofar. Like other conversos during the Spanish Inquisition, he has to hide his Jewish religion and pretend to follow the teachings of the church. But when he is asked to perform a concert celebrating the new world, he and his son Rafael devise a clever plan to usher in the Jewish New Year in plain sight of the Spanish nobility.
