In digital watermarking, an identification code (symbol) is embedded permanently inside a cover image which remains within that cover invisibly even after decryption process. The aim of watermarking is to include hidden information (i.e., imperceptible) in a multimedia document to ensure a security service or simply a labelling application.

Watermarking is the process of embedding data into a multimedia element such as image, audio or video. This embedded data can later be extracted from, or detected in, the multimedia for security purposes. A watermark can be visible or invisible depending upon the desire of the user.

Digital watermarking is the procedure of embedding information (i.e., a watermark) into the host object in such a way that the watermark image/data can be detected by authorized individuals, for assertion of authenticity purposes . The host signal can be a video, audio, image, 3D mesh, etc., while the watermark can be a logo, image, serial number, owner's ID, name, or any other information which shows ownership of the host signal.

~~SURVEY~~

Digital watermarking is a technique that embeds data called watermark into a multimedia object so that watermark can be detected to make an assertion about the objects. It can be categorized as visible or invisible. Example of visible watermarking is the logo visible super-imposed on the corner of television channel in a television picture.

Steps in DCT Block Based Watermarking Algorithm

- 1) Segment the image into non-overlapping blocks of 8×8
- 2) Apply forward DCT to each of these blocks
- 3) Apply some block selection criteria (e.g. HVS)
- 4) Apply coefficient selection criteria (e.g. highest)
- 5) Embed watermark by modifying the selected coefficients.

Embedding a digital signal such as audio, video or image with the information which cannot be removed easily is called digital watermarking. Digital watermarking mainly used to verify the authenticity, integrity of the carrier signal or to show the identity of its owners. In this paper, we present a survey on various digital watermarking techniques.
