Viruses are some of the simplest infectious agents on the planet, yet can cause severe and even life-threatening diseases in all forms of life - including humans. Despite relying on host cells in order to replicate, viruses can be capable of extremely rapid reproduction and very effective transmission from one person to another. Because of this,

The mind possesses a symbolic language the oneiric world, since ancient times Nix the goddess of the night begot the twins Hypnos god of dreams and Thanatos god of death. Hypnos and his children Morpheus, Fobetor, Fantaso, and Oniros, speak through dreams, warn, announce, reveal, predict. Who knows the meaning discovers what in dreams is revealed. The mind is unified with the existing universe without the past, present or future prevailing, navigating in dreams in time without time, the borders of human language are annulled, entering the world of symbols and images. Each dream has an interpretation, each night is the continuity of different dreams, different realities, life is not only the tangible reality that lives but lives that are ignored. In spite of all the investigations today no one can explain where the dreams occur, because future events are revealed, as the inspiration in dreams is appreciated. In this magical dictionary, you will find the techniques to identify each dream and the art of interpreting dreams and discovering a different universe of unknown realities. By knowing this book, you will discover the art of ONIROMANCE, the power to reveal the future through the meaning of dreams

The next quantum leap beyond Moneyball , this book offers powerful new insights into all human decision-making, because if sports teams are getting it wrong this badly, how do you know you're not? Sometimes the decisions that teams make are simply inexplicable. Consider: sports teams have an immense amount of detailed, quantifiable information to draw upon, more than in virtually any other industry. They have powerful incentives for making good decisions. Everyone sees the results of their choices, and the consequences for failure are severe. And yet... they keep making the same mistakes over and over again... systematic mistakes you'd think they'd learn how to avoid. Now, two leading sports economists reveal those mistakes in basketball, baseball, football, and hockey, and explain why sports decision-makers never seem to learn their lessons. You'll learn which statistics are connected to wins, and which aren't, and which statistics can and can't predict the future. Along the way, David Berri and Martin Schmidt show why a quarterback's place in the draft tells you nothing about how he'll perform in the NFL... why basketball decision-makers don't focus on the factors that really correlate with NBA success... why famous coaches don't deliver better results... and much more.
