Beautiful The Life Of Hedy
Once considered the most beautiful woman on earth, Hedy was one member of a two-person team that invented a form of technology still in use today. Her movie career in America brought her fame but not the accolades she may have wished for, and later years seem to have made for a sad and lonely woman.

The Surprising Story of Hedy Lamarr, "The Most Beautiful Girl in the World" As a teenage actress in 1920s Austria, performing on the stage and in film in light comedies and musicals, Hedy Kiesler, with her exotic beauty, was heralded across Europe by her mentor, Max Reinhardt. However, it was her nude scene, and surprising dramatic ability, in Ecstasy that made her a star. Ecstasy's notoriety followed her for the rest of her life. She married one of Austria's most successful and wealthy munitions barons, giving up her career for what seemed at first a fairy-tale existence. Instead, as war clouds loomed in the mid-1930s, Hedy discovered that she was trapped in a loveless marriage to a controlling, ruthless man who befriended Mussolini, sold armaments to Hitler, yet hid his own Jewish heritage to become an "honorary Aryan." She fled her husband and escaped to Hollywood, where M-G-M changed her name to Hedy Lamarr and she became one of film's most glamorous stars. She worked with such renowned directors as King Vidor, Victor Fleming, and Cecil B. DeMille, and appeared opposite such respected actors as Clark Gable, Spencer Tracy, John Garfield, and James Stewart. But as her career waned, her personal problems and legal wranglings cast lingering shadows over her former image. It wasn't until decades later that the world was stunned to learn of her unexpected role as the inventor of a technology that has become an essential part of everything from military weaponry to cell phones—proof that Hedy Lamarr was far more than merely Delilah to Victor Mature's Samson. She demonstrated a creativity and an intelligence she had always possessed. Stephen Michael Shearer's in-depth and meticulously researched biography, written with the cooperation of Hedy's children, intimate friends, and colleagues, separates the truths from the rumors, the facts from the fables, about Hedy Lamarr, to reveal the life and character of one of classic Hollywood's most beautiful and remarkable women.

The award-winning author of The Making of the Atomic Bomb describes the lesser-known technological talents of actress Hedy Lamarr and the collaborative work with avant-garde composer George Antheil that eventually led to the development of spread-spectrum radio, cell phones and GPS systems. (This book was previously listed in Forecast.

Hedy Lamarr's life was punctuated by salacious rumors and public scandal, but it was her stunning looks and classic Hollywood glamour that continuously captivated audiences. Born Hedwig Kiesler, she escaped an unhappy marriage with arms dealer Fritz Mandl in Austria to try her luck in Hollywood, where her striking appearance made her a screen legend. Her notorious nude role in the erotic Czech film Ecstasy (1933), as well as her work with Cecil B. DeMille (Samson and Delilah, 1949), Walter Wanger (Algiers, 1938), and studio executive Louis B. Mayer catapulted her alluring and provocative reputation as a high-profile sex symbol. In Hedy Lamarr: The Most Beautiful Woman in Film, Ruth Barton explores the many facets of the screen legend, including her life as an inventor. Working with avant-garde composer and film scorer George Antheil, Lamarr helped to develop and patent spread spectrum technology, which is still used in mobile phone communication. However, despite her screen persona and scientific success, Lamarr's personal life caused quite a scandal. A string of failed marriages, a lawsuit against her publisher regarding her sensational autobiography, and shoplifting charges made her infamous beyond her celebrity. Drawing on extensive research into both the recorded truths of Lamarr's life and the rumors that made her notorious, Barton recognizes Lamarr's contributions to both film and technology while revealing the controversial and conflicted woman underneath. Hedy Lamarr: The Most Beautiful Woman in Film illuminates the life of a classic Hollywood icon.

“Hollywood icon by day, unsung science genius by night.”

To her adoring public, Hedy Lamarr was a glamorous movie star. But in private, she was something more: a brilliant inventor. Now Laurie Wallmark and Katy Wu, who collaborated on Sterling's critically acclaimed picture-book biography Grace Hopper: Queen of Computer Code, tell the inspiring story of how, during World War Two, Lamarr developed a groundbreaking communications system that still remains essential to the security of today's technology.

A biographical historical novel covering a period of tribulation and transformation for Hedwig Kiesler, "the most beautiful girl in the world," who achieves lasting fame as movie star Hedy Lamarr--and enduring influence as an inventor.

The New York Times and USA Today Bestseller! She possessed a stunning beauty. She also possessed a stunning mind. Could the world handle both? Her beauty almost certainly saved her from the rising Nazi party and led to marriage with an Austrian arms dealer. Underestimated in everything else, she overheard the Third Reich's plans while at her husband's side, understanding more than anyone would guess. She devised a plan to flee in disguise from their castle, and the whirlwind escape landed her in Hollywood. She became Hedy Lamarr, screen star. But she kept a secret more shocking than her heritage or her marriage: she was a scientist. And she knew a few secrets about the enemy. She had an idea that might help the country fight the Nazis...if anyone would listen to her. A powerful novel based on the incredible true story of the glamour icon and scientist whose groundbreaking invention revolutionized modern communication, The Only Woman in the Room is a masterpiece.

Major Motion Picture Adaptation Coming Soon
The internationally acclaimed actress Patricia Neal (1926–2010) was a star on stage, film, and television for more than sixty years. On Broadway she appeared in such lauded productions as Lillian Hellman's Another Part of the Forest, winning the first Tony award. In Hollywood she starred opposite the likes of John Wayne, Paul Newman, John Garfield, and Gary Cooper in some thirty films. She is perhaps best known for her portrayal of Alma Brown in Hud, which earned her the 1963 Academy Award for Best Actress. But there was much more to Neal's life. She was born in Packard, Kentucky, though she spent most of her childhood in Knoxville, Tennessee. For a time, Neal became romantically involved with Gary Cooper, her married costar in The Fountainhead. In 1953, Neal wed famed children's author Roald Dahl, a match that would bring her five children and thirty years of dramatic ups and downs. At the pinnacle of her screen career, Neal suffered a series of strokes which left her in a coma for twenty-one days, and Variety even ran a headline erroneously stating that she

had died. After a difficult recovery, Neal returned to film acting, earning a second Academy Award nomination for *The Subject Was Roses* (1968). She appeared in several television movie roles in the 1970s and 1980s and won a Golden Globe for Best Actress in a Dramatic TV Movie in 1971 for *The Homecoming*. Adapted as a major motion picture (filmed as *An Unquiet Life*) starring Hugh Bonneville, Keeley Hawes, and Sam Heughan, *Patricia Neal: An Unquiet Life* is the first critical biography detailing the actress's impressive film career and remarkable personal life. Author Stephen Michael Shearer conducted numerous interviews with Neal, her professional colleagues, and her intimate friends and was given access to the actress's personal papers. The result is an honest and comprehensive portrait of an accomplished woman who lived her life with determination and bravado.

Hedy Lamarr's life was punctuated by salacious rumors and public scandal, but it was her stunning looks and classic Hollywood glamour that continuously captivated audiences. Born Hedwig Kiesler, she escaped an unhappy marriage with arms dealer Fritz Mandl in Austria to try her luck in Hollywood, where her striking appearance made her a screen legend. Her notorious nude role in the erotic Czech film *Ecstasy* (1933), as well as her work with Cecil B. DeMille (*Samson and Delilah*, 1949), Walter Wanger (*Algiers*, 1938), and studio executive Louis B. Mayer catapulted her alluring and provocative reputation as a high-profile sex symbol. In *Hedy Lamarr: The Most Beautiful Woman in Film*, Ruth Barton explores the many facets of the screen legend, including her life as an inventor. Working with avant-garde composer and film scorer George Antheil, Lamarr helped to develop and patent spread spectrum technology, which is still used in mobile phone communication. However, despite her screen persona and scientific success, Lamarr's personal life caused quite a scandal. Drawing on extensive research into both the recorded truths of Lamarr's life and the rumors that made her notorious, Barton recognizes Lamarr's contributions to both film and technology while revealing the controversial and conflicted woman underneath. *Hedy Lamarr: The Most Beautiful Woman in Film* illuminates the life of a classic Hollywood icon.

This is the autobiography of Hedy Lamarr, who is famous for two things: First: Her movie career, as she was regarded as the most beautiful woman in Hollywood. She was also the first woman ever to appear nude in a movie. Second: She is famous as an inventor, a scientist and a researcher, especially during the Second World War, as she developed and patented a method to defend against torpedoes and missiles. She also developed an anti-aircraft system where the anti-aircraft fire would not hit the aircraft but would explode nearby. Nowadays, in the aftermath of the shooting down of Malaysian Airline 17 over Eastern Ukraine, killing 298 passengers, a new look is being taken at the process developed by Hedy Lamarr. The missile that shot down the Malaysian Airplane used a system similar to the one developed by Hedy Lamarr, and the defense against torpedoes she developed might have applications to prevent future commercial aircraft from being knocked down.
