SYSTEM (Reviewed by  
Dr. R. Thapar) 6.1

Introduction Governing  
system or governor is  
the main controller of  
the hydraulic turbine.

The governor varies the  
water flow through the  
turbine to control its  
speed or power output.  
Generating units speed  
and system frequency  
may be adjusted by the  
governor.

#### UNITS 1.

**INTRODUCTION** The primary purpose of a governor for a

hydroelectric unit is to control the speed and loading of the unit. It accomplishes this by controlling the flow of water through the turbine. To understand how a hydroelectric governor operates, a basic understanding of
