Become an expert chef with this textbook which covers all the advanced preparation, cooking and finishing techniques you need to succeed in the professional kitchen. Part of the bestselling Practical Cookery series and matched to the NVQ and VRQ Diplomas, this new edition has been fully updated to include recipes that incorporate modern culinary trends and up-to-date techniques. It contains all of the underpinning knowledge you need for whichever Level 3 course you are completing. In addition, catering colleges from across the UK have contributed regional recipes which will be of interest to Level 3 and master chefs alike. - Put your knowledge into practice with 400 specially selected, easy-to-follow recipes complete with colourful photographs - Master important skills with dozens of step-by-step sequences which guide you through advanced techniques - Get hints, information and valuable advice on working in a professional kitchen from real chefs - Test yourself with questions at the end of each chapter and refine your reflection technique with special sections on identifying results and conducting independent research - Access industry-standard videos on your smartphone, tablet or computer with QR codes embedded in the text

Written with a focus on multi-disciplinary integrated care systems and a greater emphasis on prevention and patient autonomy, this title incorporates the most recent evidence-based guidelines and developments in nursing roles and contraceptive methods. An invaluable guide to women's health nursing.

Royal assent, 21st July 2008. An Act to establish and make provision in connection with a Care Quality Commission; to make provision about health care (including provision about the National Health Service) and about social care; to make provision about reviews and investigations under the Mental Health Act 1983; to establish and make provision in connection with an Office of the Health Professions Adjudicator and make other provision about the regulation of the health care professions; to confer power to modify the regulation of social care workers; to amend the Public Health (Control of Disease) Act 1984; to provide for the payment of a grant to women in connection with pregnancy; to amend the functions of the Health Protection Agency. Explanatory notes to assist in the understanding of this Act are available separately (ISBN 9780105614081)

Diploma in Dental Nursing, Level 3 is the new edition of the must-have study companion for trainee dental nurses preparing for the City & Guilds Level 3 Diploma in Dental Nursing (formerly NVQ). The book offers comprehensive support on the units assessed by portfolio - from first aid and health and safety to specific chairside support procedures - as well as the four areas of the course tested by multiple choice questions: infection control, oral health assessment, dental radiography and oral health management. This third edition of an established revision text has been substantially revised and restructured in line with the new qualification and reflects changes in the regulations and legislature affecting dentistry and dental workplaces, all of which have an effect on the daily role and working life of the dental nurse. It will be an invaluable guide for dental nurse trainees, qualified dental nurses and course providers. - Expanded and revised, with extensive coverage of the fifteen Diploma units - In full colour throughout with over 400 illustrations - Companion website with downloadable glossary and MCQs for revision and self-assessment

Infection prevention and control play a significant part in containing the spread of disease. Increased resistance to antimicrobials and the rapid spread of communicable diseases such as tuberculosis, swine flu, SARS and avian flu has highlighted the need for good IPC measures in both the healthcare setting and at home. This is a comprehensive compendium of IPC processes that can be applied to all countries. The text embraces the recent developments and recommendations in IPC from international authorities, such as the World Health Organization. It is an ideal study and teaching tool and will serve as a reference book for healthcare systems planners who wish to understand IPC and strengthen systems.

This manual contains guidance on food safety standards for the catering industry, developed by the Scottish HACCP Working Group of the Scottish Food Enforcement Liaison Committee on behalf of the Food Standards Agency Scotland. The guidance builds on existing good practice and takes account of the requirements of European food safety legislation which requires that all food businesses apply food safety management procedures based on 'Hazard Analysis and Critical Control Point' (HACCP) principles.

Written by sixteen of Canada's pioneering nuclear scientists, the book focuses on Canada's nuclear program at AECL's laboratories at Chalk River, Ontario, and Whiteshell, Manitoba, between the years 1943 and 1985. Topics include the organization and operations of AECL's laboratories, nuclear safety and radiation protection, radioisotopes, basic research, development of the CANDU reactor, and the management of radioactive wastes. As well as providing a valuable historical perspective on Canadian science, Canada Enters the Nuclear Age offers useful guidance for innovative scientific development in the future, a future that will depend on developing and nurturing technically sophisticated industry.

Providing mapping to the Common Induction Standards, this book features legislation and references to regulations where appropriate so that candidates and assessors have the information on frameworks related to the health and social care sector. It also includes information on the movements and trends in health and social care.

Standards for unlicensed aseptic preparation in the UK, as well as practical information for implementing the standards.

The word cleaning covers a wide range of activities from good housekeeping and janitorial duties to clinical process cleaning applications that form part of our everyday lives, most people are not aware of their existence, and yet without them, many of the services and products we take for granted would not be available. Most chapters include case studies of various cleaning problems together with the solutions offered. Emphasis is placed on the practical aspects of designing, manufacturing and operating cleaning equipment, this includes a detailed examination of traditional cleaning methods, and considers a number of lesser known techniques that have been developed over recent years together with a glimpse of the future trends in the industry In addition to the actual cleaning techniques, the book examines the effect, of increasing international health, safety, training, and environmental legislation together with regulations that control cleaning standards in the pharmaceuticals, cosmetics, food and drinks manufacturing industries. In this respect, the book is not intended to be a definitive reference book. Legislation and regulations are continually being upgraded, particularly those relating to European Directives. No apologies are given for the fact that the reader will be continually reminded of the need to obtain up to date copies of the various documents referred to, and to secure expert advice on those issues that are crucial in terms of health, safety and hazardous conditions. To assist the reader, useful information sources are listed in the reference section following each chapter. jkijk
