Tales of the Austral Tropics (1894) is a collection of short stories published in the Sydney Bulletin in the 1890s. Set in tropical northern Australia, Favenc brings to life the half-unknown and mysterious regions of this part of Australia at this time. The tales exude themes of the bush and bring together elements of the sensational and supernatural that are characteristic of Favenc's work. This is one of a number of works that have earned him a place in Australian literary history. This new edition of *Tales of the Austral Tropics* is a part of the Australian Classics Library series intended to make classic texts of Australian literature more widely available for the secondary school and undergraduate university classroom, and to the general reader. The series is co-edited by Emeritus Professor Bruce Bennett of the University of New South Wales and Professor Robert Dixon, Professor of Australian Literature at the University of Sydney, in conjunction with SETIS, Sydney University Press, AustLit and the Copyright Agency Limited. Each text is accompanied by a fresh scholarly introduction and a basic editorial apparatus drawn from the resources of AustLit.

A lively portrait of the "Steel City" and its millionaires and workers during the late nineteenth century. Steel portrays the growth of iron and steel in smoke-filled Pittsburgh during America's industrial age, and what it

meant for the people who lived there. This history shares the fast-paced saga of millionaire barons Andrew Carnegie, Ben Franklin Jones, Henry Clay Frick, Henry Phipps, and Charles Schwab, who often plotted and schemed against each other—as well as the story of the underpaid and undervalued immigrant workforce whose desire to unionize united their bosses against them. Here, author Dale Richard Perelman recounts this dramatic struggle and the bloody battles it spawned throughout Western Pennsylvania's plants, mines, and railroad yards.

In the Pulitzer Prize-winning novel *The Amazing Adventures of Kavalier and Clay*, prose magician Michael Chabon conjured up the golden age of comic books -- intertwining history, legend, and storytelling verve. In *The Final Solution*, he has condensed his boundless vision to craft a short, suspenseful tale of compassion and wit that reimagines the classic nineteenth-century detective story. In deep retirement in the English country-side, an eighty-nine-year-old man, vaguely recollected by locals as a once-famous detective, is more concerned with his beekeeping than with his fellow man. Into his life wanders Linus Steinman, nine years old and mute, who has escaped from Nazi Germany with his sole companion: an African gray parrot. What is the meaning of the mysterious strings of German numbers the bird spews out -- a top-secret SS code? The keys to a series

of Swiss bank accounts perhaps? Or something more sinister? Is the solution to this last case -- the real explanation of the mysterious boy and his parrot -- beyond even the reach of the once-famed sleuth? Subtle revelations lead the reader to a wrenching resolution. This brilliant homage, which won the 2004 Aga Khan Prize for fiction, is the work of a master storyteller at the height of his powers.

and artistic ceramic forms. Enjoyable reading for anyone interested in art. Although written as a ceramic guide book for beginners to advanced ceramic artists, this is also an excellent manual for teachers of all grades. This book is an adventure in creating with clay. The author takes you through the process in an easy-to-understand way. It's full of inspiring pictures of hand-built pieces along with simple "how-to" photos. The text is clear and entertaining as weaves stories, humor, history, and philosophy around detailed technical information.

Scuba Exceptional is the perfect sequel to Simon Pridmore's Scuba Confidential - An Insider's Guide to Becoming a Better Diver. It reflects the same philosophy of safe diving through the acquisition of knowledge and skills. The themes are new, there are some wonderful and extremely useful new cautionary tales and the focus this time is more on issues that face experienced divers. For example, there is more technical diving content but, as usual, Simon covers complex issues in his usual clear and easy-to-read style. In many cases, the concerns of technical divers reflect those of scuba divers at every level. After all, as he says, technical diving is on the same spectrum as conventional sport diving: it is just a different frequency. Scuba Exceptional also deals in detail with the psychological approach to scuba diving, broaching topics

from new angles and borrowing techniques and procedures from other fields of human activity. While most of Scuba Exceptional focuses on the diver, it also takes a look at the wider picture and highlights a number of areas where scuba diving professionals and the "industry" as a whole are letting divers down. As always, Simon is realistic in his assessments. He may shine a little light on the dark side of the scuba diving world, but he does this in order to illuminate bad practice and encourage change, while offering solutions. He also provides insights on a wide range of topics. For instance, do you want to know... what makes someone a good diver? how to swim against a current without getting exhausted? how you can be out of air while you still have plenty to breathe? what the concept of failure points is? how to be a defensive diver? how preconditioning applies to scuba diving? how long you should really wait between diving and flying? when to call DAN (and when not to call)? how corals could possibly be animals when they look like rocks? how to avoid being left behind in the ocean? what's happening in the world of rebreather diving? or what the perimeter of ignorance is? Scuba Exceptional has the answers to these questions and a lot more
