Written in Kathleen M. Galotti's signature engaging style, this text is a dynamic examination of cognitive development from infancy through adolescence. Updated and reorganized throughout, the Second Edition of Cognitive Development weaves together a variety of theoretical perspectives while considering issues of research methodology. Introductory chapters cover theoretical and developmental frameworks and are followed by chronologically arranged chapters, giving undergraduate and graduate students an understanding of the "whole" child in an accessible, intuitive framework.

Understanding Cognitive Development provides a fresh, evidence-based research perspective on the story of children 's cognitive development in the first ten years of human life. Starting with a brief survey of the key theoretical positions that have come to define developmental psychology, the textbook then focuses on the different cognitive abilities as they emerge throughout early development. Uniquely, it examines these in terms of their interdependence; that is how skills such as perception, memory, language and reasoning relate to one another. This holistic treatment allows students to see the many important intersections in this critical phase of human life development. This textbook employs a novel design that will be of immense help to both students and instructors and is intended to be read at two levels: at the first level, it provides a fully referenced explanatory account of experimental research on cognitive development with complete attention to the needs of students who have never been exposed to experimental methodology nor studies in cognitive development before. At the second level, and mapped directly onto numbered sub-sections within the text, the author uses illustrative panels designed along the lines of PowerPoint presentations to summarise studies and key findings, employing lots of pictorial material together with bullet-points to give vividness and texture to the material covered. These panels are replicated on the accompanying companion website in PowerPoint for lecturers and students to make further use of in teaching and revision. Revision points are provided at the end of every chapter. Rich in academic coverage, including a widespread database of the most important empirical research in the field, this textbook will be essential reading for students of cognitive development and developmental psychology across psychology and education.

A comprehensive book supported by extensive research studies and data, Bjorklund 's text presents the broadest coverage of topics in cognitive development. Unlike other books, Bjorklund shows readers how developmental function can help explain individual differences in cognition by covering both the typical pattern of change in thinking observed over time and the individual differences in children 's thinking in infancy and childhood. A major theme of this book is the continuous transaction between the embodied child embedded in a social world: although a child is born prepared to make some sense of the world, his or her mind is also shaped by forces in the physical and social environment.

Like children themselves, development is dynamic. In the chronologically organized Child and Adolescent Development in Context, award-winning author Tara L. Kuther frames development research in real-life contexts, including gender, race and ethnicity, socioeconomic status, and more. Kuther presents highly relatable examples, vivid cross-cultural stories, and case studies of real individuals, consistently prompting students to reflect on chapter content with What do you think? questions. The book emphasizes three core themes: the centrality of context, the importance of research, and the applied value of developmental science; students will come away with an understanding of these themes that they will immediately be able to apply to their own lives and future careers. INSTRUCTORS: Child and Adolescent Development in Context is accompanied by a complete teaching and learning package! Contact your rep to request a demo. At the end of the day, what is crucial is to enable educationalists to promote and apply their own metatheories and models of child development which they feel comfortable with and which enable children to develop. ... Peter Sutherland should be credited with making a significant contribution towards achieving this fundamental goal' - "Educational Psychology in Practice " ... this book deserves to become a classic in the field. Will appeal alike to academics and students in higher education, and to serving teachers- "BPS: Educational Review Section " This book provides a general outline of the dominant schools of thought on cognitive development, with a focus on Piaget. His views are outlined and a range of critical responses and alternatives are detailed. The author examines the application of these schools of thought to teaching pre-school, primary and secondary children. Each chapter includes a summary and questions for discussion. The book concludes with a glossary of terms.

Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students, few textbooks currently exist that actually do this. Child Development: An Active Learning Approach includes the following key features: - Challenging Misconceptions: true/false or multiple choice tests are incorporated at the beginning of each chapter to specifically address topics that are sources of misunderstanding amongst students. - Activities with children and adolescents: 'hands-on' activities that complement the ideas of the text, as an integral part of the text, rather than as " add-ons " at the end of each chapter. - 'The journey of research' will introduce students to the process of research that leads from early findings to more refined outcomes through real-life examples - 'Test Yourself' sections include activities that cause students to reflect on an issue through their own experiences to bring about increased motivation and understanding of a specific topic. - The Instructor's Resource CD-ROM includes a computerized test bank, PowerPoint Slides, sample syllabi, suggested in-class learning activities, and homework assignments. - The Student Study Site includes interactive videos, self-quizzes, key term flashcards, SAGE journal articles with accompanying exercises, and web links with accompanying exercises.

Chronologically organized, Child Development From Infancy to Adolescence, Second Edition presents topics within the field of child development through unique and highly engaging Active Learning opportunities. The Active Learning features integrated within the print text and digital program foster a dynamic and personal learning process for students. Within each chapter, authors Laura E. Levine and Joyce Munsch introduce students to a wide range of real-world applications of psychological research to child development. The in-text pedagogical features and the accompanying digital components help students discover the excitement of studying child development and equip them with skills they can use long after completing the course.

Lifespan human development is the study of all aspects of biological, physical, cognitive, socioemotional, and contextual development from conception to the end of life. In approximately 800 signed articles by experts from a wide diversity of fields, The SAGE Encyclopedia of Lifespan Human Development explores all individual and situational factors related to human development across the lifespan. Some of the broad thematic areas will include: Adolescence and Emerging Adulthood Aging Behavioral and Developmental Disorders Cognitive Development Community and Culture Early and Middle Childhood Education through the Lifespan Genetics and Biology Gender and Sexuality Life Events Mental Health through the Lifespan Research Methods in Lifespan Development Speech and Language Across the Lifespan Theories and Models of Development. This five-volume encyclopedia promises to be an authoritative, discipline-defining work for students and researchers seeking to become familiar with various approaches, theories, and empirical findings about human development broadly construed, as well as past and current research.

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

This encyclopedia provides an inter-disciplinary approach, discussing the sociocultural viewpoints, policy implications, educational applications and ethical issues involved in a wide range of disorders and interventions.
