and DOES NOT
require removal from
the fire extinguisher
for periodic
hydrostatic testing.

CMM 26-22-04

The parts and
components of a fire
extinguisher all play a
vital role in the
effective discharge of
water or a chemical
agent to suppress a

File Type PDF Component

fire before it can spread out of control leading to property damage and maybe even loss of life. Fire extinguishers are engineered to spray and spread an agent on a fire to remove one of the three elements necessary to maintain a fire once it has started.

Extinguishers - All

You Need To Know |

FFE

A fire extinguisher is

File Type PDF

Component

Maintenance
an active fire

protection device

used to extinguish or
control small fires,

often in emergency
situations. It is not

intended for use on
an out-of-control fire,

such as one which
has reached the

ceiling, endangers the
user (i.e., no escape

route, smoke,

explosion hazard,

File Type PDF

Component

etc.), or otherwise requires the expertise of a fire brigade.

Extinguisher

Fire extinguisher -
Wikipedia

When a fire extinguisher is removed from its box it will need to be commissioned on site under BS 5306 part 3. This should be carried out by a

File Type PDF

Component

Maintenance person.

Failure to carry this out could run the risk of invalidating fire insurance cover as it is a requirement of the Fire risk assessment under the current Fire Regulations ' The Regulatory Reform (Fire Safety) Order 2005 ' .

File Type PDF

Component

fire-extinguishers/maintenance

Fire extinguishers need to have an

external maintenance examination

conducted on a yearly basis, at the time of

hydrostatic test, or when specifically

indicated by an inspection

discrepancy.

Extinguishers need to

File Type PDF Component

have an internal
examination
conducted at
anywhere from 1-6
year intervals
depending on the
type of extinguisher.
