Afghan security forces have killed Abu Muhsin al-Masri, a senior al Qaeda leader who was on the Federal Bureau of Investigation's Most Wanted Terrorists list. Afghanistan's National Directorate of Security (NDS) said in a tweet late on Saturday. The head of the U.S. National Counter-Terrorism

"This book presents an inside account of two pioneering projects in London where Muslim community groups worked in partnership with police to reduce the influence of Al Qaeda-inspired terrorism. One project empowered London Muslims to remove Abu Hamza and his violent hard-core supporters from Finsbury Park Mosque, while the other project bolstered long-term efforts by London Muslims in Britain to challenge and reduce the influence of Al Qaeda inspired violent extremists including Abu Qatada and Abdullah el-Faisal. Significantly, both projects pre-date government funded Prevent projects and differ from them in being based on partnership, trust and voluntary civic duty as opposed to payment and control. The two projects serve as exemplars for future community-based counter-terrorism projects that recognise that the hand of central government can often be counter-productive when countering the influence of Al Qaeda: not least when the UK is waging war in Muslim countries. Flagship Prevent projects and their backers reject this analysis and argue that the work of police in these projects was itself counter-productive by empowering Muslim groups they claim are extremist or radical. This book offers a comprehensive defence to these charges and concludes that success was achieved by channelling genuine and reasonable Muslim grievances about UK foreign policy in the Muslim world in ways that are familiar and acceptable to Londoners and anathema to Al Qaeda"—Publisher's website

Robert Lambert recounts the remarkable story of two peaceful, pioneering projects to reduce Al Qaeda-inspired terrorism in a major Western city. By partnering Muslim community groups with police forces in London, one project empowered Muslims to exile the Egyptian Sunni activist Abu Hamza and his violent hard-core supporters fro.

This book examines the communicative aspects and implications of US counter-terrorist policies towards al-Qaeda. Recent US counter-terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al-Qaeda, and this book investigates in what ways, and to what extent, US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would-be terrorist. The study then draws on a growing understanding of that audience to analyse how those drawn to al-Qaeda were and, indeed, still are likely to be influenced by the perceptions of America that Washington's policies generated. The study's central argument is that, given al-Qaeda's unconventional strategy and the particularities of the world-view characterising those drawn to the group, America's counter-terrorist signalling proved largely counter-productive to America's objective of undermining al-Qaeda's strategic narrative, instead serving in many ways to validate it. Firstly, this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter-terrorist policy towards al-Qaeda. Second, it tries to capture the objectives, strategy, tactics, ideology, and other defining features of the world-view characterising those drawn to al-Qaeda. Third, it strives to combine those two lines of inquiry by applying the al-Qaeda world-view to a critical analysis of the signals sent by US policies. Finally, the book aims to offer broad policy implications that demonstrate how an informed understanding of the world-view of those drawn to al-Qaeda can be employed to revise and refine American counter-terrorist signalling. This book will be of much interest to students of US foreign policy and public diplomacy, counter-terrorism, strategy and international security. Joshua Alexander Geltzer has a PhD in War Studies from Kings College London, and is currently a juris doctoral student at Yale Law School.

This volume shows us that in order to deal with today's Fourth Generation asymmetric warfare by terrorist groups using conventional arms and weapons of mass destruction, we need a new 'global networked' approach. The contributors examine the various attempts that have been made to counter the latest wave of terrorism, including the US strikes against Afghanistan and Iraq, President George W. Bush's declaration of a 'war against terrorism', the creation of the US Department of Homeland Security, and the 9/11 Commission. Drawing from our experience with 'Terrorism Early Warning' and the co-production of counter-terrorism intelligence, this book explains the need for such a network and shows how it could be formed. It compiles the opinions of experts from clinical medicine, public policy, law enforcement and the military. These expert contributors identify the nature of a global counter-terrorism network, show how it could be created, and provide clear guidelines for gauging its future effectiveness. This book will be of great interest to all students of terrorism studies, US national security, international relations, and political science in general.

Almost two decades after the events of 9/11, this Handbook offers a comprehensive insight into the evolution and development of terrorism and insurgency since then. Gathering contributions from a broad range of perspectives, it both identifies new technological developments in terrorism and insurgency, and addresses the distinct state responses to the threat of political, or religiously motivated violence; not only in the Middle East and Europe, but also in Africa, South and Southeast Asia, and North and South America.

This book examines the role of terrorist innovation and learning in theory and practice, and in the context of three specific EU case-studies. It is often said that terrorist groups are relatively conservative in character operating in a technological vacuum – relying almost exclusively on bombs and bullets. This observation masks increasing complexity and creativity and innovation within terrorist groups and one of the most distinguishing features of al-Qaeda's terrorist operations is its propensity for remarkable innovation. This book examines how and why terrorist groups innovate more generally and al-Qaeda-related terrorist plots in Europe more specifically. The starting point for this book was twofold. Firstly to examine the issue of innovation and learning more generally both in theory, within specific themes and within the context of al-Qaeda's influence on this process. Secondly, this book examines the evolution of specific al-Qaeda-related plots in three specific northern EU states – the United Kingdom, Denmark and Germany - where there has been a significant volume of planned, failed and executed terrorist plots. In particular, these case studies explore signs of innovation and learning. This book will be of much interest to students of terrorism and counter-terrorism, political violence, security studies and IR in general.

This unique work is the first to address the subject of community engagement strategies in countering extremism, and explores the development and research of these strategies. In so doing it demystifies the process of community engagement, while simultaneously extolling the virtues of the ground breaking strategies to have been effectively employed in Asia, the Middle East, and the West. The book then proceeds to examine the efforts of community engagement made by several countries against their unique operational and geopolitical environments. Finally, detailed reference is made to the role and work of the media and non-government organizations to have conducted effective community engagement efforts. With contributions from authors of diverse backgrounds, including media, the social services, security, and academia, this book will be of interest to both the general public and to researchers.

This book examines the communicative aspects and implications of US counter-terrorist policies towards al-Qaeda. Recent US counter-terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al-Qaeda, and this book investigates in what ways, and to what extent, US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would-be terrorist. The study then draws on a growing understanding of that audience to analyse how those drawn to al-Qaeda were and, indeed, still are likely to be influenced by the perceptions of America that Washington's policies generated. The study's central argument is that, given al-Qaeda's unconventional strategy and the particularities of the world-view characterising those drawn to the group, America's counter-terrorist signalling proved largely counter-productive to America's objective of undermining al-Qaeda's strategic narrative, instead serving in many ways to validate it. Firstly, this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter-terrorist policy towards al-Qaeda. Vidino has produced an invaluable exposé of Al Qaeda's roots and tentacles in Europe and the threats that result from them. -Scott Newark, Former Crown Prosecutor, Executive Director of the Canadian Police AssociationAl Qaeda in Europe is an impressive work that provides detailed analysis on what is now Europe's most important security problem -Klaus Gruenewald, former head of Germany's security servicesThe July 2005 London bombings are yet another example of how Europe has emerged as one of the key battlegrounds in the global War on Terror. The region has become a critical ground zero for Islamist terrorists, not only as a target but as a base of operations. The implications for the United States are tremendous: under existing law, for example, terrorists carrying European passports could easily enter the country. It is not a coincidence, in fact, that every attack planned or executed against the United States, including 9/11, has had strong European ties.Al Qaeda in Europe is the first book in English that dissects Islamist terrorism in Europe. Written by Lorenzo Vidino, European expert at The Investigative Project-a Washington, D.C.-based counterterrorism institute and America's largest private data-gathering center on militant Islamic activities-Al Qaeda in Europe fills a critical gap in the understanding of the new threats posed by Islamist terrorism.Vidino analyzes the causes of this dangerous situation while providing an extensive historical overview of Islamist terrorist activities in Europe. The book shows how terrorists-most of them native to the Continent-raise money, communicate, and hide in plain sight in the suburbs of London, Paris, and Amsterdam. It also presents with painful clarity the difficulties that law enforcement agencies worldwide have had in shutting down terror cells. Finally, the book describes three of the most important networks operating in Europe. Vidino analyzes events such as the Madrid train bombings, the thwarted plot to attack various European capitals with chemical weapons, and the movements of hundreds of European Muslims who are joining terrorist groups in Iraq to fight U.S. forces.Vidino includes fascinating information taken from a dozen countries' original documentation (intelligence reports, indictments, court transcripts), plus transcripts of conversations among al Qaeda operatives that have been intercepted by intelligence agencies.Al Qaeda in Europe is authoritative, informative and written in a lively narrative that will captivate general readers, and become a valuable new resource for scholars and government officials.Lorenzo Vidino (Washington, D.C.) is widely recognized as an expert on terrorism in Europe. In March and April 2005, he testified before Congress on the subject, and he frequently consults for the U.S. government on terror-related issues. He regularly appears on television, including The NBC Nightly News, Fox News, MSNBC, CNBC, and European and Middle Eastern channels. He holds a law degree and speaks five languages.

This edited volume aims to deepen our understanding of state power through a series of case studies of political violence arising from state 'counter-terrorism' strategies. The book examines how state counter-terrorism strategies are invariably underpinned by terror, in the form of state political violence. It seeks to answer three key questions. To what extent can counter-terror strategies be read as a form of state terror? How fundamental is state terror to the maintenance of a neo-liberal social order? What are the features of counter-terrorism that render it so easily reducible to state terror? In order to explore these issues, and to reach an understanding of what it means to say that the 'war on terror' is terror, the contributing authors draw upon case studies from a range of geographical contexts including the UK and Northern Ireland, the US and Colombia, and Sri Lanka and Tamil Eelam. Analysing these case studies from a psychological-warfare and hegemonic perspective, the book also includes two chapters from Noam Chomsky and John Pilger, which provide a global and historical context. This book will be of great interest to students of critical terrorism studies, political violence, war and conflict studies, sociology, international security and IR.
