CrashCards Pediatric Emergency Resuscitation Guide (#131102) Created with speed and accuracy in mind, this is the new pediatric life support guide that combines the information provided in pediatric courses with the usefulness of a pocket-sized tool.

This guide is provided to assist the health care professional with immediate access to information required to run a pediatric acute resuscitation event. This includes, but is not limited to, pre-calculated readily available medication doses, national recognized appropriate sized equipment, defibrillation settings and much more. Created by a team of Emergency Health Care professionals who recognize what time and accuracy means when seconds count. Useful for Emergency Departments, Pharmacies, Pediatric facilities, Surgical Dental offices, EMS agencies, etc. When there's "No Time for Calculations, No Room for Error"

CrashCards Pediatric Emergency Resuscitation Guide is the new pediatric life support pocket-guide for those in the pediatric medical field. This guide includes pre-calculated, color-coded tables for immediate access to fluid, colloid, defibrillation, cardioversion and emergency medication dose recommendations. Also included are algorithms for RSI, Bradycardia, Tachycardia and Pulsenessness. You will find vital information on treatment of burns, trauma, newborns, and shock with common management of asthma, head injury and seizures. With access to trauma and coma scores, rules of 6's, triage protocols, pediatric norms and tube sizes, this guide is a must have value for the pediatric emergency medical professional. Put together by those in your profession.

Use the PEPP Textbook in the EPC Course! Emergency Pediatric Care (EPC) is a comprehensive NAEMT education program for EMS practitioners on the care of sick and injured children, addressing a full spectrum of emergency illnesses, injuries and scenarios that an EMS practitioner might encounter. Pediatric Education for Prehospital Professionals, Third Edition represents a comprehensive source of prehospital medical information for the emergency care of infants and children. PEPP is designed to give prehospital professionals the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, PEPP specifically teaches prehospital professionals how to better assess and manage ill or injured children. PEPP combines comprehensive medical content with dynamic features to fully prepare prehospital professionals to care for children in the field.

The most popular pocket reference in emergency nursing - now in a new edition! The Emergency & Critical Care Pocket Guide has been an essential resource for physicians, paramedics, and nurses for over a decade. The Pocket Guide consolidates critical information found in desk references into a convenient 3"x5" pocket-size format that is handy enough to take with you anywhere.

Pediatric Resuscitation is reviewed in this issue of Pediatric Clinics of North America, guest edited by Drs. Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

A comprehensive guide for anaesthetists on how to manage the complications and errors involved in treating paediatric patients.

Our English/Spanish Medical VLT is a multiple award winner since its first printing in 2007, including The Communicator Awards and the 2008 National Health Information Awards. This invaluable visual communication tool enables instant communication with Spanish-only speakers in urgent medical situations where language barriers could seriously hinder effective treatment. English/Spanish language panels paired side-by-side with carefully developed picture panels enable medical personnel to communicate critical-care questions and get quick answers by having patients point to adjoining pictures. The compact, hinge-laminated format makes it easy to handle and wipe clean, and fits most pockets for quick access. An essential tool for any emergency technician or medical provider that works with Spanish speaking populations.
