Booked for Christmas, a novella from debut author Lily Menon, is sure to get readers in the holiday spirit! Novelist Sophia Hart (real name: Sophie Bartholomew-Kaur-Hughes, but try fitting that on a book cover) absolutely hates her loudest critic\u2014Evan Wolfe, evil mastermind behind the Lone Wolfe book review column. They've never met, but Wolfe's favorite pastime seems to be dumping on Sophie's unapologetically happy, magical romances. Sophie, not one to be left behind, gets her revenge in her own ways (never annoy a writer in search of a villain). When Sophie decides to throw a holiday party at her cabin, Wolfe is the last person on her mind. But the universe has a twisted sense of humor. Not only does Wolfe show up as someone's plus one, but a massive snowstorm blows in, stranding them both alone together in Sophie's cabin. Over the next few days, Sophie begins to realize that Wolfe isn't as odiously cynical a man as she'd originally thought. In fact, he's kind of...sweet. And impossibly hot. But still, Sophie's been hurt before and she has so much to lose. What she needs is one sure sign that she and Wolfe are meant to be together. Will Sophie and Wolfe get their Christmas miracle?

This study investigates the acquisition of Functional Categories from the perspective of self-organization. Syntax emerges through a major bifurcation of the dynamical language system. Dynamical notions such as precursor, oscillation, symmetry-breaking, and trigger are explanatory tools for the dynamics of early child language as evidenced in the acquisition of compounding, case-marking, finiteness, V2, wh-questions, etc. The book addresses researchers from various theoretical camps: generative, functional, connectionist, by giving new answers to old questions in the light of a novel challenging theory: self-organization.
