Economic Evaluation - an overview | ScienceDirect Topics

Economic evaluation is the process of measuring cost effectiveness. An economic evaluation will measure two parameters—cost and outcome (effect). Because two parameters are measured, the results of an economic evaluation will not necessarily tell you which treatment option is “better” in the same way that a clinical trial might.

CRITICAL APPRAISAL CHECKLIST FOR ECONOMIC EVALUATIONS.

In practice, economic evaluation techniques may be used as a black-box into which assumptions are fed and from which the basis of resource use decisions are produced. The resulting decisions may be made without consideration of community views and so in contradiction of one of the basic tenets of primary health care.
