This volume approaches questions about gender and the politics of appearance from a new perspective by developing the notion of aesthetic labour. Bringing together feminist writing regarding the 'beauty myth' with recent scholarship about new forms of work, the book suggests that in this moment of ubiquitous photography, social media, and 360 degree surveillance, women are increasingly required to be 'aesthetic entrepreneurs', maintaining a constant state of vigilance about their appearance. The collection

shows that this work is not just on the surface of bodies, but requires a transformation of subjectivity itself, characterised by notions of personal choice, risk-taking, self-management, and individual responsibility. The book includes analyses of online media, beauty service work, female genital cosmetic surgery, academic fashion, self-help literature and the seduction community, from a range of countries. Discussing beauty politics, postfeminism, neoliberalism, labour and subjectivity, the book will be of interest to scholars and students with an interest in Gender, Media Studies, Cultural Studies, Sociology, Social Psychology and Management Studies. “This highly engaging, smart, and wide-ranging collection analyzes how, under the self-governing mandates of neoliberalism, the demands that girls and women regulate and control their bodies

Bottleneck (n): a person who advocates for the creation or perpetuation of government regulation, particularly an occupational license, to restrict entry into his or her occupation, thereby accruing an economic advantage without providing a benefit to consumers. The Left, Right, and Center all hate them: powerful special interests that use government power for their own private benefit. In an era when the Left hates “fat cats” and the Right despises “crony capitalists,” now there is an artful and memorable one-word pejorative they can both get behind:

bottleneckers. A “bottleneck” is anyone who uses government power to limit competition and thereby reap monopoly profits and other benefits. Bottleneckers work with politicians to constrict competition, entrepreneurial innovation, and opportunity. They thereby limit consumer choice; drive up consumer prices; and they support politicians who willingly overstep the constitutional limits of their powers to create, maintain, and expand these anticompetitive bottlenecks. The Institute for Justice’s new book *Bottleneckers* coins a new word in the American lexicon, and provides a rich history and well-researched examples of bottleneckers in one occupation after another—from alcohol distributors to taxicab cartels—pointing the way to positive reforms.

Black behind the Ears is an innovative historical and ethnographic examination of Dominican identity formation in the Dominican Republic and the United States. For much of the Dominican Republic's history, the national body has been defined as "not black," even as black ancestry has been grudgingly acknowledged. Rejecting simplistic explanations, Ginetta E. B. Candelario suggests that it is not a desire for whiteness that guides Dominican identity discourses and displays. Instead, it is an ideal norm of what it means to be both indigenous to the Republic (indios) and "Hispanic." Both indigeneity and Hispanicity have operated as vehicles for asserting Dominican sovereignty in the context of the historically triangulated dynamics of Spanish colonialism, Haitian

The retirement of the distinguished philosopher Jürgen Habermas from his chair at the University of Frankfurt signalled an important caesura in the history of Critical Theory: the transition from the Habermasian project, to different forms of inquiry in the work of the next generation. This change-over happens at a time when it has become clear that Habermas's systematic exploration of communicative rationality has reached the point where both its achievements and its limitations had become evident. The essays collected in this volume address the problems connected with this transition, partly by returning to the insights of the first generation (Adorno and Benjamin),

In *Enemy Within*, Don Watson takes a memorable journey into the heart of the United States in the year 2016 – and the strangest election campaign that country has seen. Travelling in the Midwest, Watson reflects on the rise of Donald Trump and the “thicket of unreality” that is the American media. Behind this he finds a deeply fearful and divided culture. Watson considers the irresistible pull – for Americans – of the Dream of exceptionalism, and asks whether this creed is reaching its limit. He explores alternate futures – from Trump-style

She can win by simply letting her deplorable opponent lose. On the other hand, she’s nothing if not adaptable, and she could yet see the chance to lead the nation’s social and economic regeneration ... Call it a New Great Awakening or a New New Deal; it would owe something to both, and to Bernie Sanders as well, but also to her need to be more than the first woman president.” —Don Watson, *Enemy Within* ‘Must read...[Don Watson] is the ideal person to survey Trump’s America’ —The Weekend Australian ‘A fascinating
