Health professionals often take on managerial roles at short notice and with little or no preparation. Although they may be highly clinically qualified and accomplished, the practicalities and relationships involved in management - helping staff to feel motivated and valued, building and leading teams, managing meetings and presentations, writing reports and managing change, to name but a few - present new challenges and pitfalls for which they are unprepared. This book is for managers and prospective managers who want to approach their new responsibilities professionally from the very beginning. Based on the authors' successful "Vital Signs" education programme, it identifies the critical skills needed to hit the ground running as a manager. It is an accessible, easily comprehensible guide to gaining the self-confidence and the respect of staff, and to creating a steady platform for acquiring and mastering a wide range of skills in the future. "This book is dedicated to helping leaders and managers prepare for people responsibilities. It also addresses three areas which usually make leaders and managers uncomfortable - running meetings successfully, making presentations and writing reports. [It] gives accessible and practical examples and I have no hesitation in commending it to a wide readership." - From the Foreword by John Edmondstone

Essential Skills for Health Career Success provides a review of the basic academic skills, such as reading, writing, science, and math, required for a career in healthcare. Used for a stand-alone course or as a supplement, this text is ideal for students who need a basic skills boot camp or are enrolled in a bridge course. Extensive discussion of the healthcare industry introduces students to common jobs, educational requirements, workplace environments, as well as safety and infection control procedures. Soft skills needed for career success are also discussed, as students learn strategies for overcoming communication barriers as well as legal and ethical considerations pertaining to the healthcare field. Job search strategies, resume and cover letter guidelines, and interviewing tips are included. Student outcomes are strengthened basic skills, increased comprehension of health careers, and improved job search focus.

There is no shortage of issues to be addressed in healthcare, and no shortage of good ideas. What is often lacking is an approach to influencing change that has genuine integrity and trust built in from the start. And integrity is not just a word or a vaguely held value. It has to be demonstrated practically through the way managers and clinicians engage with their colleagues. From the Preface This highly practical book provides clinicians and managers with the knowledge and tools that will enable them to successfully influence their staff and colleagues. Built on the conviction that the way to influence others is through respect and understanding - not threat or manipulation - it promotes an optimistic, confident approach to leadership where trust and respect is fostered.

This book is designed to foster quality care to home care recipients. It is written for companions, home health aides, and other care givers who deliver non-medical home care. Prieto provides information, tips, and techniques on personal care routines as well as additional responsibilities that are often necessary in this work, including home safety and maintenance, meal planning, errand running, caring for couples, and making use of recreational time. Going beyond standard nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of life.

Perfect for new teachers in undergraduate, postgraduate, or continuing education, as well as more experienced educators who want to assess, improve, and gain new perspectives on teaching and learning, Essential Skills for a Medical Teacher is a useful, easy-to-read professional resource. This book offers a concise introduction to the field of medical education, with key coverage of educational models and theory that can help inform teaching practice. Clear illustrations and practical tips throughout make it an excellent starting point for those new to the field of medical education or who want to facilitate more effective learning for their students or trainees. Provides hints drawn from practical experience that help you create powerful learning opportunities for your students, with readable guidelines and new techniques that can be adopted for use in any teaching program. Includes new coverage of "just-in-time" learning, entrustable professional activities, steps on introducing outcome/competency-based education, selecting a teaching method, programmatic assessment, self-assessment, the student and patient as partners in the education process, the changing role of the teacher, bringing about change, and the future of medical education. Covers recent developments in our understanding of the relationship between learning and technology, as well as curriculum planning and curriculum mapping. Offers practical advice from leading international expert Professor Ronald Harden and co-author Jennifer Laidlaw, who has designed and taught many courses for medical teachers. Prompts you to reflect on your own performance as an educator, as well as analyze with colleagues the different ways that your work can be approached and how your students ' or trainees ' learning can be made more effective.

Sperry (Barry University) identifies 12 skills in the areas of operations, relationships, and analysis that are essential for becoming an effective health care manager. Appropriate for both classroom and individual study, each chapter outlines the principles and practices of a specific skill, provides exercises for skill development, and concludes with a self- assessment test.
