The massacre of Aboriginal people at Myall Creek marked a critical point in the struggle over land and power between the indigenous peoples of Australia and the European invaders. It resulted in seven white men being hanged for their crimes - the last ever to hang for the murder of Aboriginal people. *Massacre at Myall Creek*, by playwright John Summons, helps students to explore the social and political climate surrounding the massacre. As well as the play, the book contains comprehensive study units, making it an excellent resource for students of Drama, English, History and Social Studies. Among other issues, it deals with displacement, racism, authority, justice, capital punishment and personal responsibility.

In 1826, a giraffe that had been captured in the Sudan, was shipped to France. Allin looks beyond the fairy tale to reveal the complex web of politics, culture, religion and greed that fueled this phenomenon.

The deluxe e-book edition of *Chasing the Sun* includes rare, behind-the-scenes video footage of superstar Juanes's early career, shows and concerts, recordings, personal life, and more. Interspersed throughout the text are exclusive interview clips that further explore the passion and truth found in Juanes's words and offer a true glimpse of the man behind the music. "I'm doing what I believe I was brought to this world to do: to create music that raises awareness, renews hearts, and generates change. I'll continue looking to the stars and traveling the globe as God permits me. And I hope I have many years left to connect through art, to play my guitar, and to continue chasing the sun."—Juanes In *Chasing the Sun*, the international music icon and humanitarian shares the incredible story of his life and how music and faith guided his path. In his own un-adulterated words, and with visually arresting images throughout—some of them never before seen—Juanes imparts his defining moments from childhood to present day, reflecting on his spiritual and musical journey and the personal and professional experiences that shaped the man he is today. Born and raised in Colombia, Juanes developed his deep

love of music from his family and learned to play guitar at an early age. By age sixteen, he became a founding member, lead guitarist, vocalist, and song-writer for Ekymosis, which went on to become Colombia's leading hard-rock band. However, it was his career as a solo artist that propelled him toward international superstardom. With great honesty, Juanes reveals how his times of glory were often intersected by times of doubt and soul-searching and how remaining true to his beliefs and passionate about his art gave him the strength and foresight to reinvent himself and his career. While his role as a recording artist is well documented, the very private Juanes has never opened up in his own words—until now.

“Where else does math become a romp, full of entertaining tricks and turns?”—Bryce Christensen, Booklist Have you ever considered why you always get stuck in the longest line? Why two's company but three's a crowd? Or why there are six degrees of separation instead of seven? In this hugely informative and endlessly entertaining book, John D. Barrow takes the most baffling of everyday phenomena and—with simple math, lucid explanations, and illustrations—explains why they work the way they do. His witty, crystal-clear answers shed light on the dark and shadowy corners of the physical world we all think we understand so well.

Known for her well-reasoned and passionately held beliefs about architecture, Ada Louise Huxtable has captivated readers across the country for decades, in the process becoming one of the best known critics in the United States. Her brilliance over so many years is unmatched, and her range has always been vast—from a plea to save a particular architectural treasure to an ongoing discussion about whether modern architecture is dead. Her keen eye and vivid writing have reinforced to readers how important architecture is and why it continues to be both controversial and fascinating. Since so much of her writing has been in newspapers, it has quickly become unavailable to her many fans. On Architecture will bring together her best work from the New York Times, New York Review of Books, her more recent essays in the Wall Street Journal, and her various books. She is personally selecting and organizing the pieces into sections like "Art and Culture" and "The Art of Architecture," and is revising them as needed to bring them up to date. Whether you love modern architecture or desire a return to Beaux Arts design, this book will give you insight into the mind and heart of a critic who has artfully brought the discussion of architecture, architects and our environment to readers for five decades.

'It all began in Cambridge. We were gathered there for the Alumni Weekend, when a thousand elderly graduates return to hear lectures from the great minds of the 21st century.' This sets Nott pondering his own mortality, the environment, but more importantly, climate change. Will the gloom mongers be proved right? This is serious stuff, but quickly spirals into fantasy. A mixture of fact, fantasy, imagination and truth, Sir John's writing is extremely funny: one premised on a serious subject but written with an ironic, irreverent twist.
