Foundations of Human Memory is organized around the major empirical paradigms used to study memory in the laboratory and the theories used to explain data obtained using those paradigms. The text begins with a focus on memory for individual items, building up to memory for associations between items, and finally to memory for entire sequences of items and the problem of memory search.

TH 1112 & by appointment. Office Location: NE20-463. E18-470. FINAL EXAM REVIEW GUIDE. Overview. Other than that which is genetically coded, everything we know is derived from and reflects memory for our past experiences. Memory is intimately involved in most, if not all, domains of human cognition, from the ability to temporarily remember a phone number or where you placed your keys to the acquisition of language and the ability to reason.
