As Mr Jackson often reiterates, the logistics business has neither the time, inclination, nor sees a need to give any more than a very basic knowledge of what the new recruit should be doing. An assumption that a Satnav or the company guidance system is all they need he sees as being misguided and bad for business. On paper the business is simple. In reality it is not. The drop-out rate from those that are 'just having a go', 'see how they get on', is phenomenal. Good people are being wasted. And as one of the

Focusing on four East European polities-Bosnia, Serbia, Bulgaria, and Romania--this book examines the dynamics and implications of processes of commercialization of security that have occurred following the collapse of communist regimes. These processes have been central to post-communist liberalization, and have profoundly shaped those states and their integration into European institutional structures and global economic and political circuits. They have also affected -- and been shaped by-- the behaviour and power of regional and global actors (e.g. European institutions, regional, and global corporations) in Eastern Europe. By virtue of the fact that they combine in complex ways local, national, regional, and global dynamics and actors, processes of security commercialization in the former Eastern bloc can be seen as instances of 'glocalization'. Several aspects of security commercialization are particularly important. To begin with, private actors --specifically private security companies (PSCs)-- have been reconstituted as partial agents of public power. As such, they have come to be systematically

involved in performing security practices traditionally associated with the state. In addition, a potent commercial logic has come to permeate public security institutions. This has led to redefinition of the relationship between the state and its population in ways that defy conventional wisdom about the role of the state, and pose difficult normative challenges. More broadly, processes of security commercialization in Eastern Europe, which involve important performative dimensions, have led to the emergence of complex, hybrid networks of security providers that transcend domestic/international, public/private boundaries and behave, in many ways, as entrepreneurs.

"One of the best texts, if not the best text, for teaching undergraduate administration and management of criminal justice organizations. Its service quality approach is remarkable." —Emmanuel Amadi, Mississippi Valley State University Rethink management in criminal justice. Administration and Management in Criminal Justice: A Service Quality Approach, Third Edition emphasizes the proactive techniques for administration professionals by using a service quality lens to address administration and management concepts in all areas of the criminal justice system. Authors Jennifer M. Allen and Rajeev Sawhney encourage readers to consider the importance of providing high-quality and effective criminal justice services. Readers will develop skills for responding to their customers—other criminal justice professionals, offenders, victims, and the community—and learn how to respond to changing environmental factors. Readers will also learn to

critique their own views of what constitutes management in this service sector, all with the goal of improving the effectiveness of the criminal justice system. New to the Third Edition: Examinations of current concerns and management trends in criminal justice agencies make readers aware of the types of issues they may face, such as workplace bullying, formal and informal leadership, inmate-staff relationships, fatal police shootings, and more. Increased discussions of a variety of important topics spark classroom debate around areas such as homeland security-era policing, procedural justice, key court personnel, and private security changes. Expanded coverage of technology in criminal justice helps readers see how technology such as cybercrime, electronic monitoring and other uses of technology in probation and parole, body-worn cameras, and police drones have had an impact on the discipline. Updated Career Highlight boxes demonstrate the latest data for each career presented. More than half the book has been updated with new case studies to offer readers current examples of theory being put into practice. Nine new In the News articles include topics such as Recent terrorist attacks Police shootings Funding for criminal justice agencies New technology, such as police drones and the use of GPS monitoring devices on sex offenders Cybercrime, cyberattacks, and identity theft Updated references, statistics, and data present readers with the latest trends in criminal justice.

News about labor unions is usually pessimistic, focusing on declining membership and failed campaigns. But there are encouraging signs that the

labor movement is evolving its strategies to benefit workers in rapidly changing global economic conditions. *Global Unions, Local Power* tells the story of the most successful and aggressive campaign ever waged by workers across national borders. It begins in the United States in 2007 as SEIU struggled to organize private security guards at G4S, a global security services company that is the second largest employer in the world. Failing in its bid, SEIU changed course and sought allies in other countries in which G4S operated. Its efforts resulted in wage gains, benefits increases, new union formations, and an end to management reprisals in many countries throughout the Global South, though close attention is focused on developments in South Africa and India. In this book, Jamie K. McCallum looks beyond these achievements to probe the meaning of some of the less visible aspects of the campaign. Based on more than two years of fieldwork in nine countries and historical research into labor movement trends since the late 1960s, McCallum's findings reveal several paradoxes. Although global unionism is typically concerned with creating parity and universal standards across borders, local context can both undermine and empower the intentions of global actors, creating varied and uneven results. At the same time, despite being generally regarded as weaker than their European counterparts, U.S. unions are in the process of remaking the global labor movement in their own image. McCallum suggests that changes in political economy have encouraged unions to develop new ways to organize workers. He calls these "governance struggles," strategies that seek not to win worker rights but to make new rules

of engagement with capital in order to establish a different terrain on which to organize.

The inquiry launched following the death of Jimmy Mubenga on a deportation flight from the UK found that although there were some positive aspects of the process, which is carried out on the UK Border Agency's behalf by a private security contractor, (initially G4S and, since 1 May 2011, Reliance Security) the Committee found evidence of: inappropriate use of physical restraint, and the possible use of unauthorised and potentially dangerous restraint techniques; weaknesses in passing on information about detainees' medical conditions to all the relevant staff ; Use of racist language by contractors; Use of excessive numbers of contractor staff. The Committee recommends that the UK Border Agency should strengthen its procedures so that its own staff feel that they are entitled and expected to challenge any poor conduct on the part of contractors. The Committee also rejects the practice of taking detainees to the airport as "reserves" in case another detainee is taken off a removal flight at the last minute. To strengthen safeguards against the ill treatment of prisoners, the Committee recommends that members of the Independent Monitoring Boards for immigration removal centres - or a similar independent monitoring network-be given access to chartered removal flights

hospital security, including licensing, regulatory requirements, litigation, and accreditation standards. Building on the solid foundation laid down in the first four editions, the book looks at the changes that have occurred in healthcare security since the last edition was published in 2001. It consists of 25 chapters and presents examples from Canada, the UK, and the United States. It first provides an overview of the healthcare environment, including categories of healthcare, types of hospitals, the nonhospital side of healthcare, and the different stakeholders. It then describes basic healthcare security risks/vulnerabilities and offers tips on security management planning. The book also discusses security department organization and staffing, management and supervision of the security force, training of security personnel, security force deployment and patrol activities, employee involvement and awareness of security issues, implementation of physical security safeguards, parking control and security, and emergency preparedness. Healthcare security practitioners and hospital administrators will find this book invaluable.

FEATURES AND BENEFITS:

- * Practical support for healthcare security professionals, including operationally proven policies, and procedures
- * Specific assistance in preparing plans and materials tailored to healthcare security programs
- * Summary tables and sample forms bring together key data, facilitating ROI discussions with administrators and other departments
- * General principles clearly laid out so readers can apply the industry standards most appropriate to their own environment

Crisis, Issues and Reputation Management defines reputation, explores how to value it and provides practical guidelines for effective reputation management, including how to approach issues of Corporate Social Responsibility. Practical and accessible, it outlines a comprehensive approach to managing situations that may turn into crises and handling crises once they occur. Featuring a wide range of international case studies of brands who have had to respond to a variety of crises including Nestle, Unilever, General Electric, McDonald's, Coca-cola, Cadbury, Tesco, Pan Am, RBS and more, Crisis, Issues and Reputation Management demonstrates how organizations have to understand and respond rapidly to shifting public values, rising expectations, demands for public consultation and increasingly intrusive news media. As such, it provides a new and broader perspective on the topic for new and seasoned practitioners alike.
