Adding the grip rating to the label ensures tyre manufacturers don't compromise grip in order to get a good energy rating. The rating is based on wet braking in a straight line. In reality, braking distances also depend on a host of additional factors, but industry analysts have estimated that using grade A tyres over grade G ones can result in a 30% shorter stopping distance.

### Tyre Speed Ratings & Markings Explained - Which?

The whole package then receives a rating, not just the boiler itself. Installers should be in the know when it comes to requirements and labelling, but as our guide to boiler replacement explains, you should always seek out multiple quotes, and make sure that professionals are registered with bodies that provide assurance that the work will be of high quality.

The difference between an IP rating and an IPX rating is more straightforward than you might think: in fact, □IPX□ is not entirely valid as a separate IP code in and of itself. Ratings that feature an □X□ somewhere in the code simply denote that a numerical rating has only been provided for one of the two main ingress types (foreign body or moisture), but not for the other.
