Approximately five million people worldwide speak Albanian. The opening of Albania in the 1990s to broader trading and diplomatic relations with other nations has created a need for better knowledge of the language and culture of this country. This book teaches the student to communicate in everyday situations in the language, with each chapter introducing a new situational context. Students learn to discuss work, vacations, health, and entertainment. Students also learn to practice basic skills such as shopping, ordering tickets, and renting an apartment. Upon completing this textbook, students will be at the A2/B1 level of proficiency on the scale provided by the Common European Framework of Reference for Languages (CEFR). The textbook includes:

- eighteen lessons

based on real-life situations, including three review lessons • dialogues to help introduce vocabulary and grammatical structures • comprehension questions and exercises • related readings at the end of each chapter • full translations for all examples discussed in grammar sections • a series of appendixes with numerous charts summarizing main classes of nouns, adjectives, and verbs • an appendix with the solutions to most of the exercises in the book • a glossary with all the words in the dialogs and readings.

"A useful text and reference book. These essays are at their best in serving both area study and political sociology."---Slavic Review "Wolchik and Curry have assembled an all-star cast of experts for an authoritative assessment of the progress the region has made toward liberal democracy and a market economy in the last two decades. The book's particular strength is to cast the process in terms of a return to Europe. It thus pays attention not only to crucial developments in domestic politics but also to the influence of important international actors. Another exceptionally useful feature is the inclusion of essays that address important issues cross-nationally, as well as in-depth studies of each country individually, making the book especially valuable to students and scholars interested in the politics of the region and those interested in the interaction between domestic issues and global political and economic forces."---Michael Bernhard, Pennsylvania State University "This is a straightforward and lucid overview of the paths taken away from communism by Central and East European states. The authors effectively address the domestic and international influences on the course of political

development in the former communist states. The book is highly recommended to anyone who wants a clear picture of a complex and important region and its constituent parts."---Zvi Gitelman, University of Michigan Now in a fully updated edition, this essential text explores the other half of Europe, the new and future members of the EU along with the problems and potential they bring to the region and to the world stage. Clear and comprehensive, it offers an authoritative and up-to-date analysis of the transformations and realities in Central and Eastern Europe, the Baltics, and Ukraine. The book presents a set of comparative country case studies as well as thematic chapters on key issues, including European Union and NATO expansion, the economic transition and its social ramifications, the role of women, persistent problems of ethnicity and nationalism, and political reform. New to this edition is a chapter on Albania. For students and specialists alike, this book will be an invaluable resource on the newly democratizing states of Europe.

The satisfiability problem of propositional logic, SAT for short, is the first algorithmic problem that was shown to be NP-complete, and is the cornerstone of virtually all NP-completeness proofs. The SAT problem consists of deciding whether a given Boolean formula has a " solution " , in the sense of an assignment to the variables making the entire formula to evaluate to true. Over the last few years very powerful algorithms have been devised being able to solve SAT problems with hundreds of thousands of variables. For difficult (or

randomly generated) formulas these algorithms can be compared to the proverbial search for the needle in a haystack. This book explains how such algorithms work, for example, by exploiting the structure of the SAT problem with an appropriate logical calculus, like resolution. But also algorithms based on “ physical ” principles are considered. I was delighted to see how nicely the authors were able to cover such a variety of topics with elegance. I cannot resist saying that the introduction to SAT on page 9 is absolutely the best I ever expect to see in any book! Donald E. Knuth, Stanford University This book gives lucid descriptions of algorithms for SAT that are better than you would think! A must-read for anyone in theory. William Gasarch, University of Maryland It was a wonderful surprise to see a deep mathematical analysis of important algorithms for SAT presented so clearly and concisely. This is an excellent introductory book for studying the foundations of constraint satisfaction. Osamu Watanabe, Tokyo Institute of Technology

The Routledge Companion to Central and Eastern Europe since 1919 is a compact and comprehensive reference guide to the area, from the Treaty of Versailles to the present day. With particular focus on the early nationalist and subsequent fascist and communist periods, Adrian Webb provides an essential guide to the events, people and ideas which have shaped, and continue to shape, central and eastern Europe since the re-ordering of Europe at the end of the First World War. Covering cultural, economic, political, and environmental issues, this broad-ranging and user-friendly volume explores both the common heritage and collective history of the region, as well as

the distinctive histories of the individual states. Key features include: wide ranging political and thematic chronologies maps for clear visual reference special topics such as the economy, the environment and culture full list of office holders and extensive biographies of prominent people in all fields glossary of specialist terms. With a wealth of chronological, statistical and tabular data, this handy book is an indispensable resource for all those who wish to understand the complex history of central and eastern Europe.

Professor Skendi, a native of Albania, traces the progress and setbacks of Albania's long struggle for national unity during this least-known period of its intricate history. He discusses the heritage of its people and examines in detail the developments that led to Albanian independence: national resistance to the decisions of the Congress of Berlin, later opposition to Turkey, and the struggle between the Albanians and the Young Turks. Consideration is given to such internal problems as geographic configuration, religious and political division, and to such external problems as Italo-Austrian rivalry, political interference from neighboring states, and the involvement of great powers.
