HMV 1611 Radiogram. This "Recent Repair" was kindly contributed by Nigel Hughes. Description In the late 1940s and 1950s, a large radiogram was something of a status symbol and quite costly. Many incorporated more advanced circuitry than their table-model brothers and sisters and if you have the space, they can be a worthwhile addition to a collection. This radiogram is very heavily built ...

The name Michael Harris will be synonymous with that as the acknowledged expert on LNER - and indeed a number of other types of railway coach. The author of three books on LNER vehicles, all have been out of print for some time leaving a considerable gap in the market for those who yearn to obtain a copy of one of definitive works on the subject. This paperback reprint will go some way to filling that need, reproduced on quality art paper and at a fraction of the price the market had been asking for second- hand copies.

Canny, infuriating, cynical and generous by turns, Felix Dennis was a true one-off. When he died in 2014 he was a multi-millionaire. Yet he spent his last months writing poetry and planting the millionth tree in his own forest in Warwickshire. Journalist Fergus Byrne got to know him well in this time and was granted exclusive access to Dennis's archives and papers. He found everything had been kept and, along with hours of interviews with girlfriends, family, staff and friends the world over, he has now written the only authorised biography of a man who described himself as lucky to have led several lives. His early rebellious days started with dropping out of grammar school, playing in a rock 'n' roll band, and being imprisoned (with Richard Neville and Jim Anderson) for charges of obscenity relating to a priapic Rupert Bear in the 'schoolkids' issue of the magazine Oz. The launch of Kung-Fu magazine, created when Dennis spotted a queue at a Leicester Square cinema for a Bruce Lee film, changed his fortunes. An industrious and self-destructive era then followed. He moved to America, added the magazines MacUser and Maxim to his portfolio, but also discovered crack, hookers and S & M. When his lifestyle led him to hospital, he gave up the drugs overnight and took to writing poetry. He acquired a mansion in Warwickshire, bought a much loved home in Mustique from rock star David Bowie, gave generously to charities, planted the largest broadleaf forest in Britain, and published several volumes of verse promoted by very well received readings nationwide. This is a hugely readable account of one of the most extraordinary characters of our time.

For anyone who has ever dreaded the blank page or struggled to find something to write and then agonized over how best to write it, or has simply found writing to be hard work, The Playful Way to Serious Writing breaks down common writing barriers and frees the writer within. Drawing on extensive experience in teaching creative writing and a lifetime of free artistic expression, Roberta Allen, novelist, short story writer, and author of Fast Fiction, has created a unique book of writing exercises packed with hundreds of verbal directives and visual cues. The key, Allen says, is ENERGY, "the force behind the words, the desire to bring forth something that has never before existed." Allen's ENERGY METHOD, which focuses creativity without interruption or that nagging inner critic, can be used for any type of creative effort at any level -- stories, novels, plays, memoirs, sketches, journals, and more. Attractive, engaging, funny, and free ranging, The Playful Way to Serious Writing is more than just a writing guide -- it is an endless sourcebook of ideas and a trusted creative companion.

What is the greatest challenge facing humanity this century? The answer is, how we can produce the energy and resources we need without endangering the future of human life on the planet. And yet, there aren't many books which present technical and political strategies for a rapid progress towards a safe planet - one powered by clean renewable energy alone. This is a real pity because many intelligent people would love to read a book on this subject. SAFE PLANET is the first book to describe a road-map towards a new world, a safe planet. It combines meteorological data and existing tried and tested technologies and it tackles the sticky problem of the existing global political and economic power structures. This optimistic book is a rallying cry for all those concerned about what the future holds for their children. If you are worried about your energy bills and the price of fuel, about the prospect of 'the lights going out', if you want to stop the environmental pollution and the alarming rate of species extinction, if you are against fracking, if you are for a cleaner better transport and energy infrastructure, if you are sick of the rich getting ever richer at the expense of the rest of us, this compelling and clear narrative about the crisis and its solution is for you.
