Words in both law and religion can shape power relationships and are often highly disputed. Shari`a lies within the overlap of these two spheres and provides a unique subject for the study of meaning in that liminal space. This book contributes important insights related to Islamic jurisprudence and secularism in the Turkish context and regarding the role of language in contested legal and religious contexts. The study begins by providing a historical framework for the ideas and terms covered, including concepts of religion in general, Shari`a in particular, and secularism in the Turkish state. It goes on to examine empirical research to describe and analyze contemporary Turkish understandings of religion and Shari`a. The author's research indicates that there is often a disconnect between supporting the adoption of Shari`a and supporting the regulation of everyday behavior through civil codes. Thus, "Shari`a" seems to have taken on new meanings as groups have sought either to appropriate or criticize it. It is a quintessential example of fractured and contextual meaning at the center of both religious and legal traditions. This book is essential reading for both academics and those interested in law, linguistics, history, political science, anthropology, sociology, religious studies, or Near Eastern studies.

Each of the chapters in this reader is written by leading scholars in the area of relationships, reflecting the diversity of the field and including both contemporary and key historical papers for comprehensive coverage of research.

Most stress is a normal part of daily life, and can be coped with adequately by the individual. Prolonged or more serious stress however may require professional help. A local GP can often provide this but in many cases will refer the client to a mental health worker or other health professional. Originally published in 1990, this title was written for each of these groups: as a practical handbook and guide for those professionals working in the field of mental health, but also written for the referring GP and those seeking help themselves. The authors integrate theoretical and academic material relating to anxiety and stress research with clinical experience. The book begins with a theoretical section offering a working model of stress, a guide to diagnostic classification, and alternative models of anxiety. This is followed by chapters on assessment, explaining the problem and treatment procedures to the client, teaching specific self-help skills, and changing stressful lifestyles. Advice is also given on running anxiety and stress management groups, and individual case studies are examined. The authors make extensive use of analogy and metaphor to ensure ready understanding and recall. They also include many useful inventories, questionnaires, charts and client handouts. Anxiety and Stress Management will be of use to all health professionals working with people who have anxiety and stress related problems, but will prove equally valuable for the clients themselves as a reference book and as a means of self-education and self-help.

Combining thematic chapters and country cases, Comparative Politics Today: A World View sets the standard for introducing the field of comparative politics and for illustrating how to compare the world's political systems. They have names like Barmy Bernie, Daft Donald, and Steamin' Sammy. They like lager (in huge quantities), the Queen, football clubs (especially Manchester United), and themselves. Their dislike encompasses the rest of the known universe, and England's soccer thugs express it in ways that range from mere vandalism to riots that terrorize entire cities. Now Bill Buford, editor of the prestigious journal Granta, enters this alternate society and records both its savageries and its sinister allure with the social imagination of a George Orwell and the raw personal engagement of a Hunter Thompson.
