CHAPTER 1: MATHEMATICS OF INVESTMENT Prepared by: Francis Joseph H. Campeña 3 Interest can be viewed as a lender or a borrower. Sometimes if we are the investor, we consider the value of our investment after a given period. In this case we introduce the concept of future values or accumulated values or maturity value. Example 2. April wants to borrow ₱40,000.00 from a bank that gives an annual interest rate

Mathematical finance, also known as quantitative finance and financial mathematics, is a field of applied mathematics, concerned with mathematical modeling of financial markets. Generally, mathematical finance will derive and extend the mathematical or numerical models without necessarily establishing a link to financial theory, taking observed market prices as input.
