### Excel Formulas and Functions For Dummies Cheat Sheet

A function is a pre-defined calculation built into Excel that makes it easier to write formulas. For instance, in the cheat sheet below: Today() is a function that gives you the current date. Today() + 10 is a formula that adds 10 days to the current date. The terms formula and function are often used interchangeably, so we will stick to using "formulas" to avoid confusion in this basic cheat sheet. Just remember, you make your own formulas, while functions are pieces of code programmed into ...
