Explores the human urge to create, in terms of art, religion, mythology, and social institutions, and seeks to understand the relationship of art to the individual and to society

A plea for the acceptance of the irrational element in man is the most vital part of human life and Rank discusses the ultimates: death, immortality, sexuality, love.

Once Freud's most favoured student and associate, Otto Rank came to be reviled by the psychoanalytic establishment that formerly revered him. This biography exposes the hostile, at time libelous treatment of Rank in the standard histories of psychoanalysis and shows him to be a great analytic pioneer of this century. Explores the relationship of a person's inner world to the outer world of reality, and suggests ways to manipulate the outer world through positive externalization of the will

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

This book offers the first comprehensive examination of the psychodynamic theories of artistic creativity and the arts. Neither oversimplifying the complexity of these theories, nor bogging down in pedantic discourse, it honors the depth and richness of the work of Freud, Adler, Kris, Reich, Jung, and several lesser-known theorists, while making their theories readily accessible to the educated reader. After discussing the role of theory, the work offers each concept as a readily usable template for describing and understanding a work of art, whether painting, sculpture, music, dance, film, poetry, or prose. With these theories at hand, anyone interested in the arts will possess a far richer vocabulary for describing the artistic experience and a deeper understanding of the artist ' s creativity.
