Object Oriented Programming in PHP - Tutorialspoint

Object-oriented programming has several advantages over procedural programming: OOP is faster and easier to execute; OOP provides a clear structure for the programs; OOP helps to keep the PHP code DRY 'Don't Repeat Yourself', and makes the code easier to maintain, modify and debug; OOP makes it possible to create full reusable applications with less code and shorter development time

PHP OOP Intro - W3Schools

Object-Oriented Programming (OOP) is a programming model that is based on the concept of classes and objects. As opposed to procedural programming where the focus is on writing procedures or functions that perform operations on the data, in object-oriented programming the focus is on the creations of objects which contain both data and ...
