What is Removable Orthodontic Appliances - Dr Jamilian

Removable appliances. Removable braces are as the name says – a type of brace that is worn all the time except for when it needs to be removed (e.g. for cleaning, sports, etc.). They have a plastic base (that fits into the palate of the mouth or around the lower teeth) with attached wires and sometimes springs. The brace allows the teeth to move gradually by applying gentle pressure.

Removable appliances – The Orthodontic Practice

Advantages of removable orthodontic appliance compared to fixed appliance. 1. Can be removed for tooth brushing. 2. Palatal coverage contributes to increased anchorage. 3. Easy to adjust (the wires can be easily bent, and the acrylic base can be easily trimmed or added to at the chairside) 4.
