Several methods of actually drawing the sample so as to satisfy (9A.51) are suggested by Sampford. One is to draw the first unit with probabilities z_i ; and all subsequent units with probabilities proportional to $z_i/(1-nz_i)$ with replacement. If a sample with n distinct units is obtained, this is accepted.

This book was developed from a course of lectures on sample survey techniques which I gave for a few years at North Carolina State College to students who intended to make their careers in the field of statistics. The purpose of the book is to present a reasonably comprehensive account of sampling theory as it has been developed for use in sample surveys, with sufficient illustrations to show how the theory is applied in practice, and with a supply of exercises to be worked by the student.
