In science, a formula is a concise way of expressing information symbolically, as in a mathematical formula or a chemical formula. The informal use of the term formula in science refers to the general construct of a relationship between given quantities. The plural of formula can be either formulas (from the most common English plural noun form) or, under the influence of scientific Latin, formulae (from the original Latin). In mathematics, a formula generally refers to an identity which equates

To calculate the interest that'll accumulate on the loan, you'd use the following formula: Principal x interest rate x term of the loan. Plugging in our numbers, it would be: \$10,000 x .05 x 4 = \$2,000. So that \$10,000 loan will cost you \$2,000 in simple interest. Car loans, home mortgages, and student loans use simple interest.
