In theory, there is no difference between theory and practice, but in practice, as most programmers know, there is practically no similarity between theory and practice. This maxim applies to C compilers for IBM mainframes. In 1996 a message posted to the Usenet discussion system credited Nobel-Prize-winning scientist Richard Feynman: 5

~~In Theory There Is No Difference Between Theory and ...~~

- In theory, many assumptions are made to explain the phenomenon and concepts whereas in real life, there are no assumptions and conditions are always unique
- Most of the subjects consist of a theory as well as practical part, but there are some courses that are vocational in nature and need to be taught through first hand practice.

~~Difference Between Theory and Practice | Compare the ...~~

A theory is a thought, an idea about the way the world works that allows you to predict what will happen if you do something. Practice is doing; what happens when you do the thing. The better the theory, the better the match between your thoughts and predictions and what occurs in practice. Theories are theoretical. Practice is practical.
