Although humans can't hop into a time machine and go back in time, we do know that clocks on airplanes and satellites travel at a different speed than those on Earth. We all travel in time! We travel one year in time between birthdays, for example. And we are all traveling in time at approximately the same speed: 1 second per second.

According to Einstein's theory of special relativity, the passage of time is relative to an object's speed. The more quickly an object moves through space, the more slowly time passes for it compared to an observer traveling at a slower pace. The classic example of traveling into the future is the twin paradox.

## **The 50 All-Time Best Time-Travel Films - IMDb**

Time travel is the concept of movement between certain points in time, analogous to movement between different points in space by an object or a person, typically with the use of a hypothetical device known as a time machine. Time travel is a widely recognized concept in philosophy and fiction. The idea of a time machine was popularized by H. G. Wells's 1895 novel *The Time Machine*.

## **Time travel - Wikipedia**

To move or journey in one side of something and out another. We'll be traveling through a long tunnel shortly, so you won't get any reception on your cell phones for a while. We should travel through the forest to reach the camp quicker. 2. To move or journey around or across something or some place.
